***NOTE:** The Live Bird Weight (weight of a bird before it is slaughtered) must be reported in KILOGRAMS (kg) in Column 7. If the processed weight is in lb, you must use this formula below to convert processed lb weight back into Live Bird kg weight:

FORMULA: **live kg = processed lb ÷ 0.7370 ÷ 2.2046** EXAMPLE (with processed weight of 1,000 lb): **1,000 ÷ 0.7370 ÷ 2.2046 = 615.46 live kg**

Please be advised that should the ACP Office not receive an accurate report of bird weights, calculations will default to the average weight of chickens marketed for the same type of bird in the previous year, as per Alberta Chicken Producers Marketing Regulation.

FAILURE TO COMPLY WITH ALBERTA CHICKEN PRODUCERS MARKETING REGULATION REPORTING REQUIREMENTS MAY RESULT IN AN INSPECTION OF THE PREMISE AND/OR SUSPENSION OF THE PRODUCER'S LICENSE.
